

As a resident of my local community, Air 1 serves a real need to its neighbors. Air 1 provides resources necessary to operation of my local church by providing local event information, useful links, and sound Christian music. If Air 1 were to be displaced by a Low Power FM station, a service to the community would be diminished by not providing music with positive messages. My family enjoys listening to Air 1, and I know that my children are not listening to violent or immoral lyrics. This station helps to allow my family to come together and discuss issues facing young children today. It provides a platform to help bring up topics that all parents need to discuss with their children. This station and the great service that it provides to the local community would be sorely missed if the FCC allows the new broadcast service. My family urges the FCC to continue to allow Air 1 to broadcast in my neighborhood.
